Dear Howard

Thank you once again for your assistance last week, and I am delighted to give you a testimonial.

It has been more than 20 yrs that you have, directly and indirectly, been doing work for me. It all that time you have always proved to be professional in all aspects of anything that you have undertaken.

That is why I had no hesitation in recommending your company to my Managing Director as the ideal candidate for the first stage in developing our new Design Centre.

Although the time scales were very tight, due to being let down by our prime contractor, you came up trumps yet again. Not only did you meet your time scale but your craftsmen on site worked with the other trades to maximise the rate of progress.

It was on this basis that there was no demure in your company undertaking the second and final stage of the project, including the MD's office! Again everyone was more than happy with the work and the way it was completed, and that it was again on time.

I also appreciate the fact that when you have recommended trades-persons to me they have always proved to be very proficient in their respective fields. I indicates to me the standards that you expect of those who work for you either directly or indirectly.

I would not hesitate to use you in the future or to recommend you to anyone who was looking for a professional job, at a realistic price.

I wish you all best for the future

Best Regards

George Jones
